Forecast for Friday 26 Nov 2021

Weather: Cloudy with outbreaks of occasionally heavy rain and initially sleet or wet snow. The precipitation turns more showery around dawn and the showers, while becoming fewer and further between turn increasingly to snow, with sunny spells developing. Showers merging to give a longer spell of snow towards later this evening, towards midnight, with possible blizzard conditions.

Chance of cloud free mountain/hill tops above 600m: Little chance at first improving to 75% through the morning. Chances fall again through the evening.

Visibility: Periods or persistent cloud above 450-600m with patches below at first, gradually becoming more occasional above 600m through the morning before increasing again in evening. Otherwise visibility several kilometres in rain and sleet, becoming very good between the showers through daylight hours and at first this evening.
